

# Entuity® 16.0 Patch Notification

## Technical Bulletin

**Version 2017.07.19**

**July 19, 2017**

We are pleased to confirm the availability of patch **P04** for Entuity 16.0, which has now been certified for customer use; further details of the benefits to be gained from this patch are set out in the table below.

### Latest Patch Details:

Functional Area	Platform(s)	Problem Description
Configuration Management	All	Fixed an issue affecting the display of context menus in Configuration Monitor.
Device Support	All	Added enhanced support for Huawei MA5608T devices. Port details tab, and large interface index values displayed correctly in explorer.
Inventory	All	Fix to support the duplicate IP checkbox when adding devices using Inventory seed files.  Fix to enable a router or firewall device with the same configured MAC address on more than one of its ports to be uplinked with more than one switch.
Reporting	All	Fixed an issue that caused the running of Flex Reports to fail.
Security Updates	All	Updates to include the latest security fixes and updates. <ul style="list-style-type: none"><li>- MariaDB updated to version 10.0.31</li><li>- MariaDB-java-client updated to version 1.5.9</li></ul> New code signing certificate added to Component Viewer to ensure continuing successful authentication.

### Important Notice

Before installing this patch, please check whether the *sw\_site\_specific.cfg* file refers to any configuration files that were provided by Entuity. If so, please contact Entuity Support who will ensure the compatibility of any such files and, if necessary, provide new files to be applied before installing the patch.

A full set of Patch Notifications for all certified Entuity patches is stored in the Entuity Training Academy and can be accessed by logging in to: <https://training-academy.entuity.com>. If you do not yet have login credentials you can request a login on this site. If you have any questions regarding Entuity patches, please contact Entuity Support who will be pleased to assist.

### **Downloading Patches:**

Patches for all supported platforms are available from the Entuity FTP site: <ftp.entuity.com/>

The site is arranged into separate directories for each Entuity version, operating platform and patch number. Each directory also includes a readme file and any other relevant documents, including checksums, which you are advised to verify before applying each patch. Patches must always be applied via the Patch Installer, which will ensure they are applied in a consistent and reliable manner.

Access to the Entuity FTP site requires a valid username and password that can be obtained from Entuity Support. For added security, the FTP site requires connection via SFTP or FTPS.
