Entuity® 16.0 Patch Notification

Technical Bulletin
Version 2017.12.22
December 22, 2017

We are pleased to confirm the availability of patch **P05** for Entuity 16.0, which has now been certified for customer use; further details of the benefits to be gained from this patch are set out in the table below.

Latest Patch Details:

Functional Area	Platform(s)	Problem Description
Configuration Management	All	Fixed an issue whereby ScriptEngine failed to connect to recent versions of OpenSSH. Fixed an issue whereby a '\' character in the configuration file would cause it's display to be truncated in the web UI. Fixed an issue that prevented users from viewing or comparing configuration files for a device on a remote server.
Security Updates	All	Updates to include the latest security fixes and updates: - MariaDB updated to version 10.0.31 - MariaDB-java-client updated to version 1.5.9 - Tomcat updated to version 7.0.82 - Apache HTTPd updated to version 2.4.29

Important Notice

Before installing this patch, please check whether the sw_site_specific.cfg file refers to any configuration files that were provided by Entuity. If so, please contact Entuity Support who will ensure the compatibility of any such files and, if necessary, provide new files to be applied before installing the patch.

A full set of Patch Notifications for all certified Entuity patches is stored in the Entuity Training Academy and can be accessed by logging in to:

Downloading Patches:

Patches for all supported platforms are available from the Entuity FTP site: ftp.entuity.com/

The site is arranged into separate directories for each Entuity version, operating platform and patch number. Each directory also includes a readme file and any other relevant documents, including checksums, which you are advised to verify before applying each patch. Patches must always be applied via the Patch Installer, which will ensure they are applied in a consistent and reliable manner.

Access to the Entuity FTP site requires a valid username and password that can be obtained from Entuity Support. For added security, the FTP site requires connection via SFTP or FTPS.
