- Check Point firewall memory
- Cisco ASA HA status
- Cisco FirePower device performance and inventory
- Cisco IE device inventory
- Dell EMC OS10 switch performance and inventory
- Draytek device memory
- FireEye device memory
- Gigamon device performance and inventory
- LANcope Stealthwatch device inventory
- Meinbery NTP device inventory
- MicroSemi NTP device inventory
- OpenGear device performance and inventory
- Radware device reboot detection
- SilverPeak device inventory
- Stonesoft Forcepoint performance
- Zyxel ES Serie device performance and inventory

Addition of support for negative temperature values from CISCO-ENVMON-MIB.

Addition of support for Active Sessions on Juniper SRX devices.

Fixed issues affecting IPv6 management:

- Remote terminal and config monitor did not work for an IPv6-managed device in a zone.

		<ul style="list-style-type: none"> No ICMP latency data was available for IPv6-managed devices.
Event Management System	All	Fixed an issue whereby Power Supply Unknown Status events were raised when devices were unreachable.
General UI/UX Improvements	All	Fixed an issue whereby some SNMP value strings were incorrectly formatted as hexadecimal.
ICMP Monitor	All	Fixed an issue whereby IPv6 addresses were not pinged on devices when the ICMP Monitor was set to ping management IP addresses only.
Reporting	All	Fixed an issue affecting the Report Builder, whereby reports containing user defined report attributes could not access the specified prime time, and therefore the defined attribute would display a null value.
RESTful API	All	<p>Fixed an issue affecting RESTful API that could prevent a user from using the POST method to raise events on an Entuity server.</p> <p>Addition of a source field to the Events RESTful API POST call.</p> <p>Improvement to dataAccess RESTful API GET call so that parameters can be passed to the Data Access template.</p>
SDN Controller	All	<p>Enhancements to support and polling of Cisco APIC controllers, including fabric and leaf capacity utilization data, cluster usage statistics and port status information.</p> <p>Improvement so that a user can configure the SDN Controller asset type for configuration monitoring CLI retrieval.</p>
Security Updates	All	<p>Update to the Log4j v2 library to fix the CVE-2021-44228 vulnerability.</p> <p>Update to the latest versions of the following third-party software:</p>

		<ul style="list-style-type: none"> • Apache HTTPD updated to version 2.4.51 • Apache Tomcat updated to version 9.0.53 • JRE updated to version 11.0.12
System	All	Improved topology discovery of links between applications and servers.

Notes

Important: Entuity recommends upgrading to this latest patch as soon as possible in order to fix the CVE-2021-44228 vulnerability in the Log4j v2 library.

ENA is supplied with the RSSO client version 20.02.00. Your RSSO client version should not be greater than the RSSO server version. Please contact Entuity support if your RSSO server version is less than 20.x in order to obtain a compatible RSSO client.

Please refer to the [Knowledge Base](#) on the Entuity Help Center for help and information on functionality added in this patch.

Entuity recommends that all servers in a multi-server configuration run the same patch version.

Downloading Patches

Patches for all supported platforms are available from the Entuity FTP site (<ftp.entuity.com/>), and the Product Downloads section of the BMC Support Central site (<https://www.bmc.com/support/support-central.html>).

The Entuity FTP site is arranged into separate directories for each version, operating platform and patch number. Each directory also includes a readme file and any other relevant documents, including checksums, which you are advised to verify before applying each patch. Patches must always be applied via the Patch Installer, which will ensure they are applied in a consistent and reliable manner.

Access to the BMC patches on the Entuity FTP site requires a valid username and password that can be obtained from BMC Support. For added security, the FTP site requires connection via SFTP.
