Entuity v22.0 Patch Notification P06

April 29, 2025

Technical Bulletin April 29, 2025

Version 2025.04.29

We are pleased to confirm the availability of patch P06 for Entuity v22.0, which has now been certified for customer use; further details of the benefits to be gained from this patch are set out in the table below.

Latest Patch Details

Improvements and Fixes in P06

Please refer to the [Knowledge Base](#) on the Entuity Help Center for help and information on functionality added in this patch.

Functional Area	Description
Asset Management	Fixed an issue where certain SNMP configurations could cause processes to crash.

Notes

Entuity recommends that all servers in a multi-server configuration run the same patch version.

IMPORTANT: v22.0 P06 must be installed immediately after configuring v22.0 P05 as there is a necessary fix within P06 to correct an issue where certain processes would crash.

Downloading Patches

Patches for all supported platforms are available from the Entuity FTP site: <ftp.entuity.com/>

The site is arranged into separate directories for each Entuity version, operating platform and patch number. Each directory also includes a readme file and any other relevant documents, including checksums, which you are advised to verify before applying each patch. Patches must always be applied via the Patch Installer, which will ensure they are applied in a consistent and reliable manner.

Access to the Entuity FTP site requires a valid username and password that can be obtained from Entuity Support. For added security, the FTP site requires connection via SFTP.
