Latest Patch Details

Improvements and Fixes

Functional Area	Platform(s)	Description
Account Management	All	Enhancements to user authentication, including: <ul style="list-style-type: none">● global password settings.● one-time password option for new users.● group-based user expiry.● global password and timeout expiry.● LDAP password change.● password expiry notification.
BMC TrueSight Operations Management Integration	All	Fixed an issue whereby TSOM dashboards were redirecting to incorrect links.
Configuration Management	All	Fixed an issue whereby Configuration Monitor streams were ageing out after their keep time was exceeded, therefore

		preventing the downloaded files from being accessible.
Reporting	All	<p>Fixed an issue whereby the Flex Report would crash if an invalid report period was entered.</p> <p>Fixed an issue whereby the Flow Analysis report did not work for zoned devices.</p>
RESTful API	All	<p>Fixed an issue whereby the User Session timeout was not available via the RESTful API.</p> <p>Improvement so that users can change inventory device names in RESTful API without having to run proliferate, and fixed an issue that stopped more than one inventory attribute being changed per a single call.</p> <p>Fixed an issue affecting servers in LDAP mode, whereby RESTful API calls to update a user would fail because it would attempt to update user groups, even when no user groups were specified in the call.</p>
Security Updates	All	General security improvements.
Zones	Linux	Fixed an issue affecting users using zones whereby, under certain circumstances, Entuity failed to associate inbound traps with the appropriate managed device.

Downloading Patches

Patches for all supported platforms are available from the Entuity FTP site:
<ftp.entuity.com/>

The site is arranged into separate directories for each Entuity version, operating platform and patch number. Each directory also includes a readme file and any other relevant documents, including checksums, which you are advised to verify before applying each patch. Patches must always be applied via the Patch Installer, which will ensure they are applied in a consistent and reliable manner.

Access to the Entuity FTP site requires a valid username and password that can be obtained from Entuity Support. For added security, the FTP site requires connection via SFTP.
